Exam in Foundations of web design

13.07.2020

Write the CSS style rules into the style.css file in order to create the website shown at the last page. The CSS file is already linked with the html file. In the images directory you'll find the needed image files. **You are only allowed to change the style.css file in the css directory.** The other files and directories must not be changed. The hierarchy of the project is given on the Image (right). In the CSS you need to use the followng fonts:

- 'Abel', sans-serif – for whole text

- 'Satisfy', cursive - for titles

- 'Oswald', sans-serif – for menu, buttons

The behaviour of the links is shown in the hover.png image:
